

BOILER TREATMENT CHEMICALS

Aries Chemical provides a full line of products to provide corrosion and deposit control in boilers, steam lines, condensate lines and associated equipment used in utilities, commercial and industrial facilities. Aries treatment programs are designed to prolong equipment life, reduce utility costs, and reduce maintenance and manpower expenses. USDA, FDA and Kosher approved treatments available.

PRODUCTS	APPLICATIONS
Deposit and Corrosion Inhibitors	Control deposits and corrosion in steam boilers, condensers, heat exchangers, hot water heaters, tanks and pipes.
Oxygen Scavengers	Remove oxygen as potential corrosion source. Sulfite, hydrazine, carbohydrazide and diethylhydroxylamine based oxygen scavengers.
Condensate Return Line Corrosion Inhibitors	Control corrosion in condensate return systems. Volatizing and filming amines.
Descalers	Remove hard water deposits from boilers, condensers, heat exchangers, hot water heaters, tanks and piping.
Feed Equipment and Test Kits	Pumps, mixers, tanks, and test kits for boiler treatment systems
