

## COOLING WATER TREATMENT CHEMICALS

Aries Chemical provides innovative products for corrosion, deposit and microbiological control in open and closed cooling water systems used in utilities, institutional and industrial facilities. Aries Chemical's treatment programs are designed to prolong equipment life, reduce utility, maintenance and manpower expenses. USDA/NSF approved treatments available.

PRODUCTS	APPLICATIONS
<b>Deposit and Corrosion Inhibitors</b>	Specially formulated products provide complete protection against corrosion of both ferrous and nonferrous metals, as well as protection from scale formation and fouling caused by suspended solids.
<b>Microbiocides</b>	Oxidizing and non-oxidizing microbiocides protect cooling water system from biofilming and corrosion caused by algae, bacteria and fungi. Aries Chemical's microbiocide program is tailored to meet each cooling system's unique requirements.
<b>Dispersants</b>	Highly concentrated dispersants for the removal of organic and inorganic deposits in cooling water systems.
<b>Descalers</b>	Remove hard water deposits from cooling water systems
<b>Feed Equipment and Test Kits</b>	Pumps, mixers, tanks, and test kits for cooling water systems
