

## **WATER & WASTEWATER TREATMENT CHEMICALS**

Aries Chemical supplies a complete line of inorganic and organic chemicals for water and wastewater treatment. Whatever your water and wastewater treatment needs, Aries can supply you with the proper treatment chemicals and application expertise. Aries' systematic approach to each unique situation will utilize the latest technology to ensure that your facility remains in compliance at the lowest costs. NSF certification is available for drinking water applications.

<b>PRODUCTS</b>	<b>APPLICATIONS</b>
<b>Coagulants – Inorganic and Organic</b>	Inorganic, organic and blended coagulants for raw, process and waste water treatment. Aries supplies a broad range of coagulants for process optimization. NSF, FDA and GRAS products available.
<b>Flocculants</b>	Liquid and Dry flocculants for raw, process and waste water treatment. Aries flocculants are designed to improve clarification, flotation and solids dewatering. NSF, FDA and GRAS products available
<b>Sludge Conditioners</b>	Polymers, flocculants and body feeds to improve sludge dewatering.
<b>Neutralization</b>	Aries has a variety of acids and bases for neutralization and alkalinity control. Acids include inorganic and organic acids. Bases include caustic soda, soda ash, lime, magnesium oxide and magnesium hydroxide.
<b>Heavy Metal Precipitants</b>	Aries Chembreak and PrecipMet products provide metals removal to ultra-low ppb concentrations
<b>Defoamers</b>	Aries defoamers control foam in process and wastewater treatment applications. Applications include: food processors, pulp and paper, textile, automotive and metal finishers. Food grade defoamers available.
<b>Filter Aids</b>	DE, Perlite and Cellulose Filter Aids to improve filtration and dewatering rates.
<b>Activated Carbon &amp; Organoclay</b>	Powdered and granular products for removal of highly soluble contaminants including BOD, COD, pesticides, PCBs and colors.
<b>Odor Control Agents</b>	A variety of chemicals and systems to control odors. Products to control sulfide, sulfur and anaerobic/septic based odors.
<b>Cleaners</b>	AriKleen cleaners for all situations including RO and UF. AriKleen product line includes general purpose, degreasers, alkaline, acidic and chlorinated cleaners
<b>Oxidizing &amp; Reducing Agents</b>	Aries offers a variety of oxidizing and reducing agents for applications such as hexavalent chromium reduction and sulfide and chlorine oxidation.
